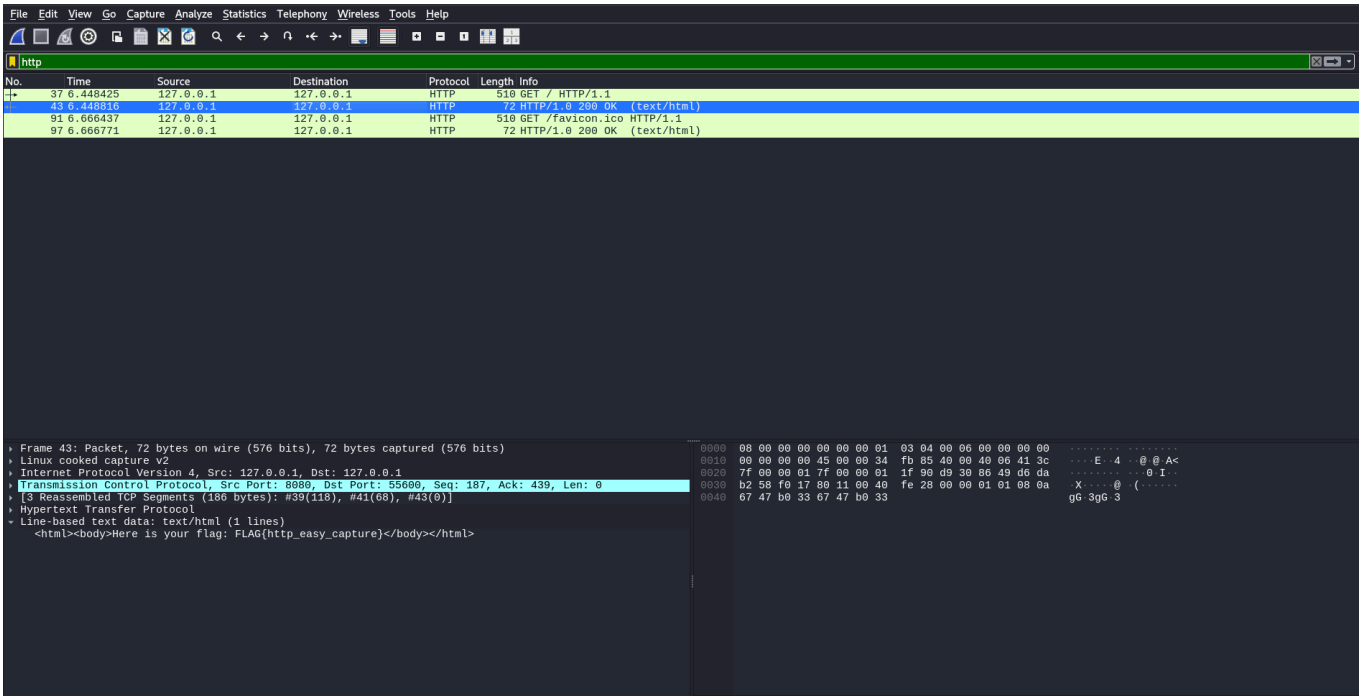
Class 5 Task

Flag 1 : Task

Hint: “Sometimes secrets travel unencrypted. Inspect the messages your browser asks for.”

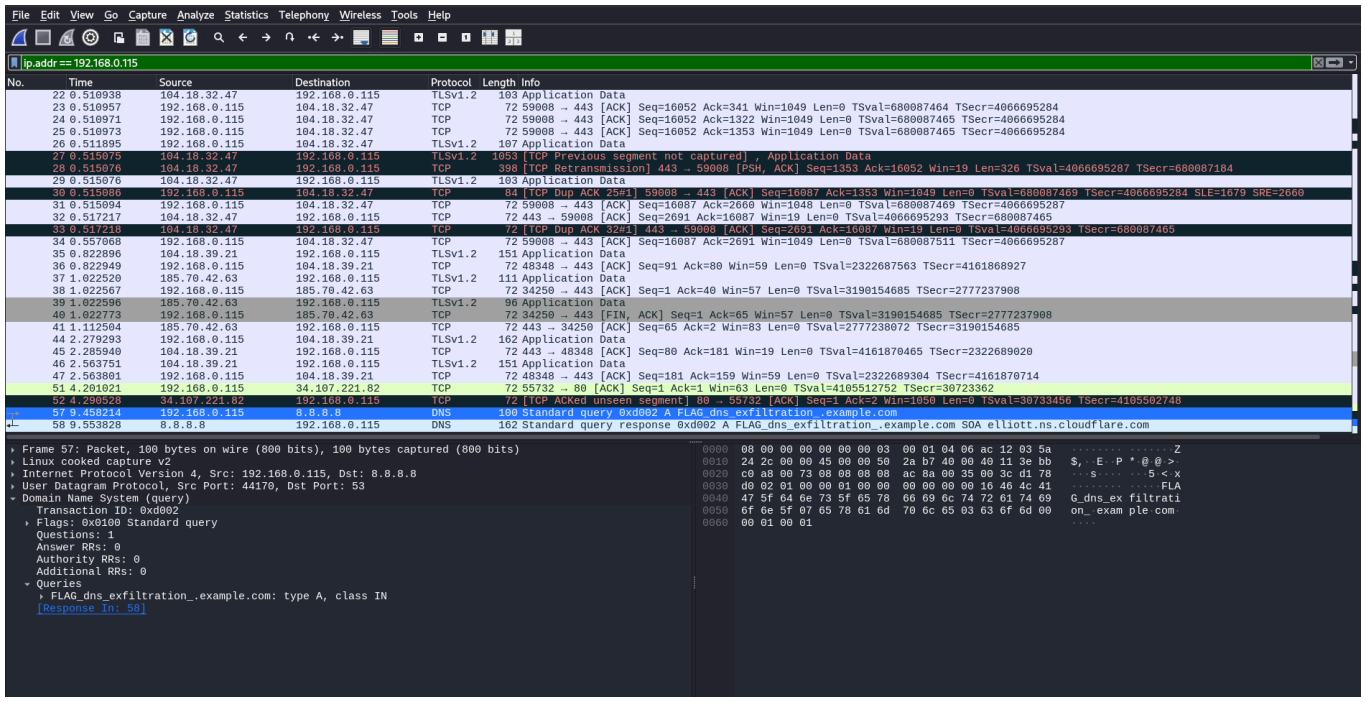


here we found the first flag in the packet with http protocol where the browser asks itself

Flag: FLAG{http_easy_capture}

Flag 2 : Task

Hint: “Even small questions can carry hidden messages. Check what your system is asking the internet.”

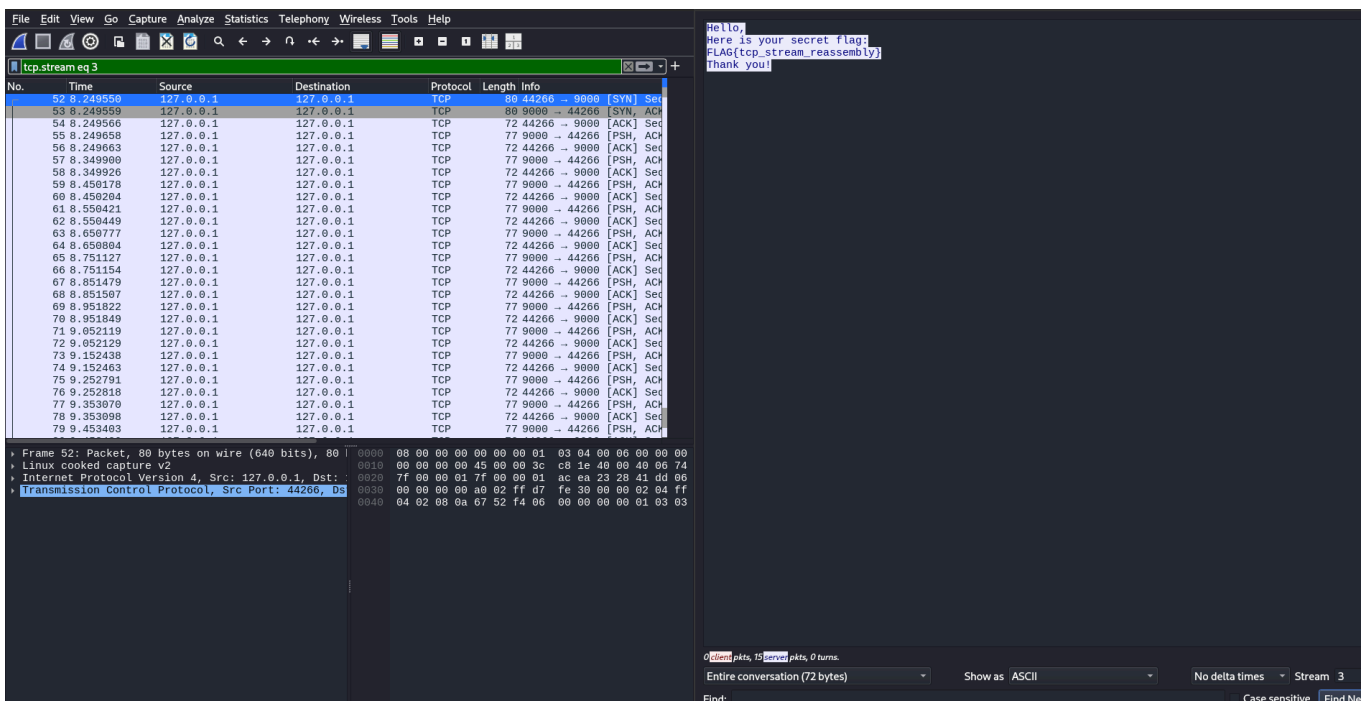


here we found the second flag by checking packets where the the system itself asked them for.

Flag: FLAG_dns_exfiltration_examplecom

Flag 3: Task

Hint: “The answer might be broken into pieces across multiple packets. Reassemble to see the whole picture.”

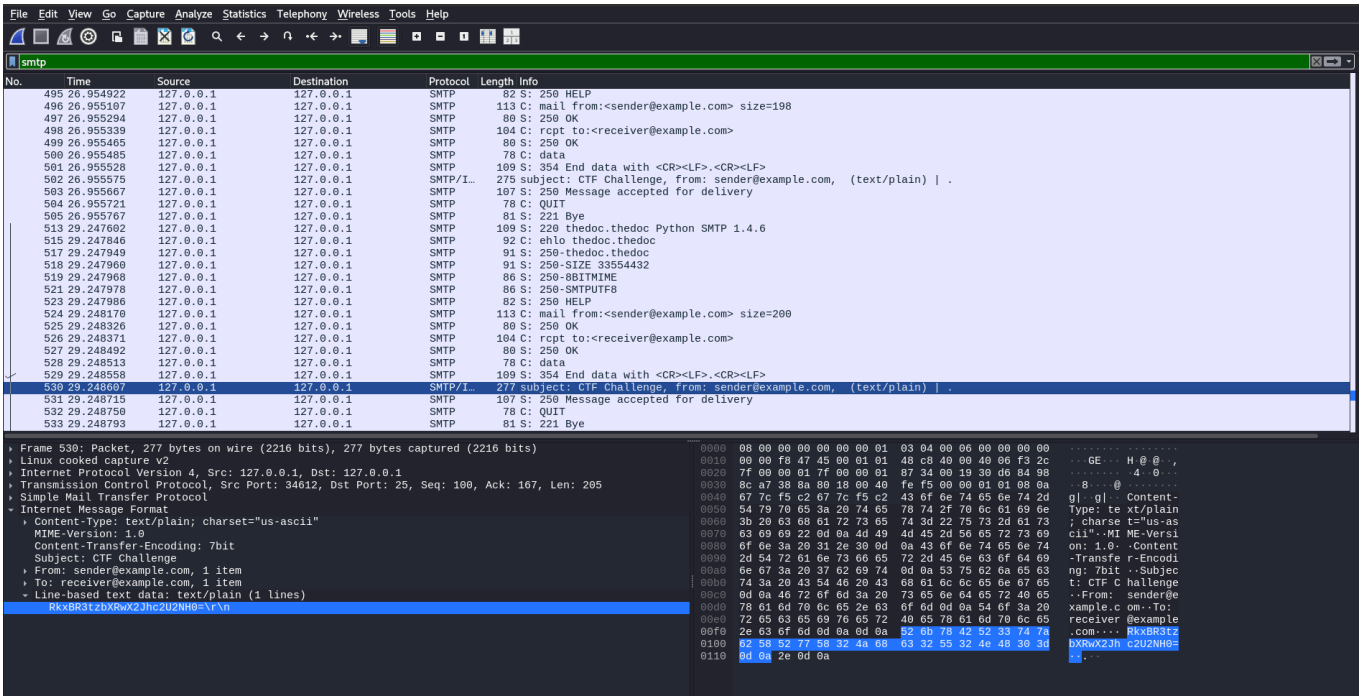


here we found the 3rd flag by combining the fragmented data in the TCP stream.

Flag: FLAG{tcp_stream_reassembly}

Flag 4: Task

Hint: “Some messages arrive encoded. The transport might reveal patterns in the body rather than the headers.”

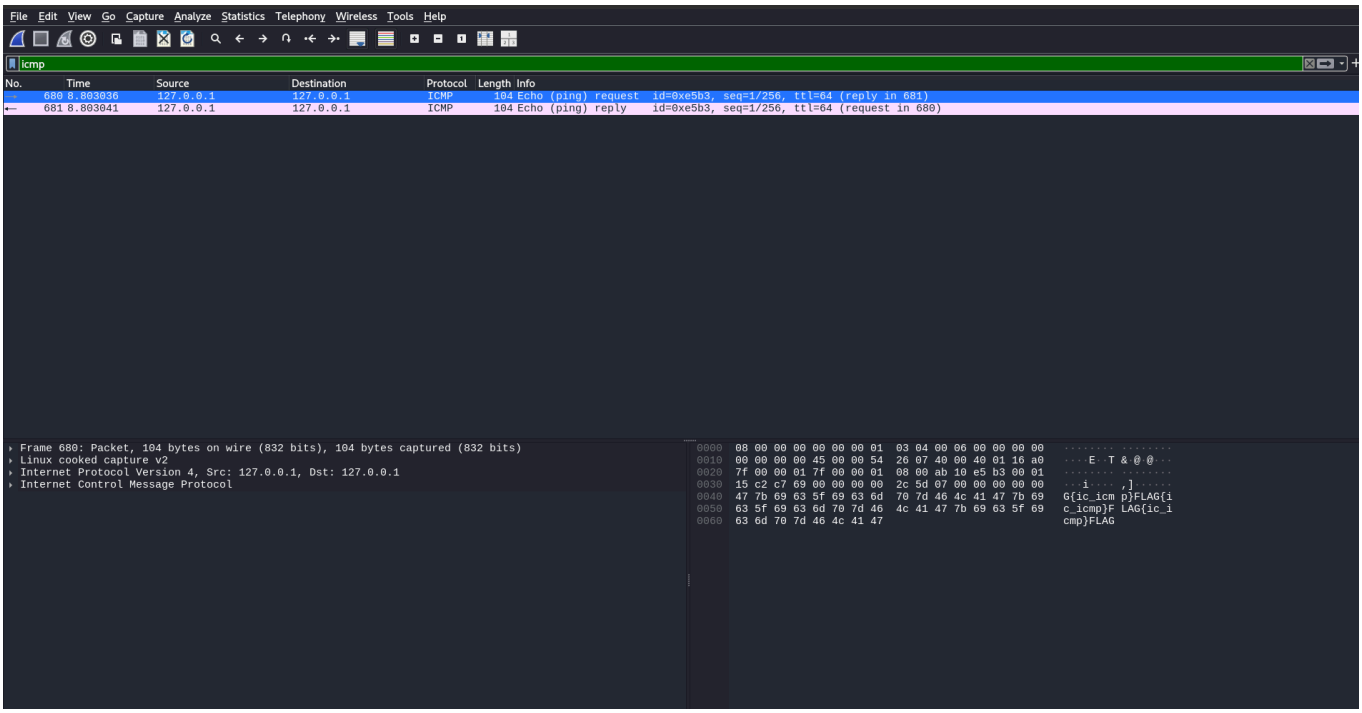


we found the 4th flag in SMTP packets encrypted using base64 encoding .

Flag: FLAG{ic_icmp}

Flag 5: Task

Hint: “Even simple pings can carry secrets inside them. Don’t just look at the summary—peek at the payload.”



here we found the last flad in an ICMP protocol packets since we were given the hint that it is in ping requests , as we can see we can find the flag in both the request and response

Flag: FLAG{smtp_base64}
